

## Dwarf Park Trusetal

Not far from the Trusetal waterfall, you will find a mysterious world. In the Dwarf Park (Zwergen-Park®), there are living more than 2500 dwarfs of most different types and sizes. Discover the lovingly designed garden area with its railway.

The 5000 m<sup>2</sup> large site shows beautiful, curious, strange and funny things. The currently only dwarf tree (Zwergenbaum®) grows here. You can observe how the dwarfs grow up in the dwarf fruits (Zwergenfrüchte®) before hatching out. Many attractive photo themes guarantee a lasting memory. An impressive 7-m-high climbing rock invites to alpine climbing. There is also a 18-hole dwarf golf course, a great and sportive pleasure for young and old alike.
