

## The Kneipp & Kleinbahn Radweg – K<sup>2</sup>

### The Kneipp & Kleinbahn Radweg – K<sup>2</sup>

On the light railway line between Bad Langensalza and Kirchheilingen which was abandoned in 1969, a cycling track was built in 1995. Along this track, attractions worth seeing and experiencing have been created.

The K<sup>2</sup> leads you to gentle hills, expansive cultural landscapes and fields, along small tranquil villages where a lot of interesting things can be detected. There are many opportunities to make a rest and to let one's gaze wander. And when the weather is fine you can even see the state capital Erfurt or the Inselsberg (Island Mountain) in the Thuringian Forest. Off the route, there are also worthwhile destinations – small churches, contemplative shady village greens and lovingly restored buildings. Take some time and explore this unique region.
