

## Nature Trail Thiemsburg

### National Park Hiking Trail

If you have visited the canopy walkway and afterwards want to immerse into the “sea of trees” at which you had marvelled from above, we would recommend you to take a walk on the Nature Trail Thiemsburg.

The 4-km-long circular trail runs through deciduous and mixed forests rich in species. At the Steingraben, you can see magnificent meanders and interesting forms of trees. The “Old Oak”, being the thickest tree in the National Park with a circumference of 5.45 m, is also situated at this hiking trail. You should plan about 1.5 hours for this circular trail.
